WEDNESDAY EVENING, SEPT. 16.

A NEW FLYING MACHINE. - An apparatus for navigating the air has been invented by a German named Franz X. Pappey, who is now in this city, which it is claimed effectually accomplishes the object for which it is designed. Mr. Pappey says he has made a working model which fully demonstrates the value of the invention. It consists of a framework, supported by two cylinders, placed horizontally, to be filled with gas. Between these is an upright cylinder in which are a number of fans which, revolving rapidly, are to elevate the whole apparatus. Under them is is a cylinder placed horizontally, in which a number of fans, revolving rapidly, are expected by driving the air backward to propel the machine. An engine constructed on the hydraulic and caloric principles combined, in which petroleum is to be used for fuel, is conveniently placed, and is to keep the fans in motion. The steering is to be done with a rudder resembling the sail of a ship.—N. Y. Times Sept. 8.

OLD HUNDRED. - This tune appears to have been compiled from the Gregorian chants. There are four of these old chants is existence, from which the whole of Old Hundred may be made up. Its compiler was not Luther, but most probably William Tranc, who furnished the music to the Geneva Psalms, published in 1564. In that publication the tune in question was contained. It was originally known as the One Hundredth Psalm. Thence its present title-New York Sun.

This College was organized with reference to the oft repeated suggestion of Washington that a University at the Federal Metropolis would tend to the "assimilation of the principles, opinions and manners of our countrymen by the common education of a portion of its youth from every quarter." Its graduates have verified the expectations of

Madison and Monroe, that the facilities of hearing debates in Congress, arguments in the Supreme Court, and Lectures from eminent men, and of visiting Libraries and Collections in Science gathered at this centre would foster a comprehensive mental development. The Preparatory School gives a thorough training for busin ess and preparation for College. The College proper has eight efficient Professors; all the chairs being filled. The Theological School has three Professors and Lecturers; the Law School four, and the Medical ten .-The expenses are as low as at other colleges. Number of students the past year 434.

STOVES, TINWARE, &c. THIE GREAT DIAMOND HEATER.

This magnificent Stove stands in the same relation to other stoves as the precious jewel from which it derives its name does to other jewels. Profiting by past experience, we have thrown into it all the commendable qualities of the most popular Stoves, and have added inventions of our own, rendering it the best combination of philosophy and mechanics now in the market, and making it a perfect stove. By the arrangement the combustion of gasses is perfect, and greater efficiency is obtained to perform what we claim for it, with a great diminution in amount of fuel necessary. It is unequalled in every particular, in beauty, in workmanship, in durability, and as a home necessity is peerless. It is a self-feeder, and not likely to get out of order. We earnestly invite comparison of this stove with others, and feel confident its great experiently, will insure the preference. This superiority will insure the preference. PATENT
BALTIMORE PARLOR HEATERS GAS BURNERS.

Our celebrated Patent Heaters for Anthracite and Bituminous coal, have given the utmost satisfaction to the thousands who have put them in their houses the past few years. They have as brilliant and cheerful appearance as an open grate fire, and are decidedly more economical and desirable. They have the greatest heating capacity of any fireplace Stoves in use—heating from two to four and five rooms with one fire. Considerable expense has been incurred recently in getting out our new patterns and it is pronounced by all that for beauty of finish and tasteful ornamentation and construc-tion, our new Stoves are unequalled, and they are the most powerful and pleasant of heaters. Fire may be kept up in them for months by ad-

ding coal every twelve hours. The demand for and popularity of our Heaters is unabated. They can be obtained of Messrs. PURCELL & HOY.
